

Bharathi Govindasamy

Bharathi Govindasamy
Head of Engineering
and Technology– Stores
Products

Bharathi Govindasamy is an individual with proven delivery and management skills on building complex IT systems for 17 years. She works as **Head of Engineering and Technology– Stores Products** for Tesco HSC and we all know that Tesco is a global retailer with world class IT systems.

Bharathi specializes in conceptualizing, building, managing IT teams to solve specific business problems and enhance benefit realization for the group. As Head of Engineering and Technology, she is responsible for design, development, testing and support of all the IT applications in her purview.

In her earlier roles with Tesco, she was the Head of Stores Test hub, responsible for delivering the testing services for the entire Stores area. She and her team also worked on automation of test regression suites as part of a delivery excellence initiative. An interesting part of her assignment also included landing the Point of Sale system as part of global operating model into 5 different countries across Asia and Central Europe.

She has been instrumental in building the IT team in the formative years of the Tesco HSC Bangalore center.
